# About Arvind B. Soni, MD

**Arvind B. Soni, MD** is a board-certified Radiation Oncologist who received his medical degree from the University of Medicine and Dentistry at the Robert Wood Johnson Medical School in Piscataway, New Jersey. Prior to attending medical school, he graduated from Rutgers University with honors in electrical engineering and was admitted to two national engineering honor societies. Dr. Soni completed his Radiation Oncology residency at Strong Memorial Hospital in Rochester, New York, where he was Chief Resident. He later was promoted to Assistant Professor at the University of Rochester, Strong Memorial Hospital, Department of Radiation Oncology, working alongside renowned leaders in oncology. He is a member of the American Society of Therapeutic Radiation Oncologists, and the Florida Medical Association.

Dr. Soni has been a pioneer in advancing new Radiation Treatments and actively participated in national clinical trials. While treating many different types of cancers, he has become a leading expert in the latest non-surgical targeted forms of radiation therapy. Having worked on algorithms for the placement of radioactive seeds, he is an expert in the treatment of prostate cancer. Dr. Soni also has built a reputation for successfully treating breast cancer with focused radiation, including those patients with troublesome left breast tumors, as well as individuals who have implants or tissue expanders. Utilizing image-based techniques as well as VisionRT™ and AlignRT™ technology, Dr. Soni can target the regions that need to be treated while minimizing dose to critical structures.

Dr. Soni contributes his unique skills to the prestigious Dattoli Cancer Center, and would welcome your inquiries.
